Features	<ul style="list-style-type: none"> • Tape demonstrated no evidence of wear through after Taber Abrasion at 1000 cycles, using CS-10 wheel and 1000g load when applied to S-37 mounting sheet. • Low water vapor transmission rate <0.50 g/100in.²/24hrs. • Thick caliper UHMW polyethylene tape for extended service life as a protective surface against tough impact wear or sliding applications. • Outstanding abrasion resistance so will outwear PTFE and other materials in sliding applications. • Low coefficient of friction characteristics is exceeded only by PTFE. • UHMW-PE tape can be used where lubrication is not possible because of contamination. • Rubber Adhesive provides good initial tack for immediate bonding to material surface. • Liner makes it ideal for fabricating or die-cutting into various lengths and shapes.
Application Ideas	<ul style="list-style-type: none"> • Noise reduction between dissimilar parts. • Reduce squeaks, rattles and other noises that occur with movement • Lining of conveyer guide rails, tank and bin liners, and discharge chutes. • Protection for aluminum sheets on stretch forming presses. • Liners for Spray booths. • Slick surface for easy glide for drawers and cabinets.
