## Polyester tapes

| Reference | Carrier thickness<br>(mm) | Carrier Colour | Tape Thickness<br>(mm)  | Release liner                                    | Adhesion(2) /<br>Cohesion | SAFT(3) | Description   |
|-----------|---------------------------|----------------|-------------------------|--|---------------------------|---------|---|
| D5395B    | 0.012                     | ВК             | 0,050                   | Si paper 90 g/m² havana                          | 10 N/20 mm<br>0.5 mm/3 h  | 185 °C  | Mounting tape for small and fragile foam parts in electric / electronic equipment. It can also be used for fixing parts for compact home appliances   |
| 53820B    | 0.023                     | ВК             | 0,200                   | Si paper 65 g/m² white                           | 16 N/20 mm<br>0.5 mm/3 h  | 185 °C  | Designed to mount plastics and metals. Typically mounting of lenses onto mobile phones or for fixing parts for compact home appliances.   |
| 50xxP     | 0.012                     | TR             | 0.050<br>0.100<br>0,150 | Si PE-coated paper 125 g/m <sup>2</sup><br>white | 10-18 N/20 mm<br>1 mm/3 h | 135 °C  | Multiple purpose tape, especially suitable for low surface energy substrates.   |
| D5306     | 0.050                     | TR             | 0,220                   | PP<br>0.07 mm red or white                       | 20 N/20 mm<br>1 mm/3 h    | 185 °C  | Heavy duty tape suitable for rough surfaces. Typical applications are mounting of displays, name- plates and plastics.  |
| D5304     | 0,036                     | TR             | 0,165                   | PP<br>0.07 mm red or white                       | 18 N/20 mm<br>1.0 mm/3 h  | 185°C   | High holding power tape for different substrates. Typical applications are mounting of displays and name plates.  |
| D5318     | 0.050                     | WH             | 0,220                   | Si PE-coated paper 125 g/m <sup>2</sup><br>white | 20 N/20 mm<br>1 mm/3 h    | 185 °C  | Heavy duty tape suitable for rough surfaces. Typical applications are mounting of displays and nameplates.  |
| D9605     | 0.050                     | TR             | 0,220                   | Si paper 90 g/m² havana                          | 20 N/20 mm<br>1 mm/3 h    | 185 °C  | Heavy duty tape suitable for rough surfaces. Typical applications are displays and nameplates mounting and box sealing. Also available with white PE coated paper liner (D9605S).   |
| D5331     | 0.012                     | TR             | 0,070                   | Si PE-coated paper 125 g/m²<br>white             | 12 N/20 mm<br>0.5 mm/3 h  | 185 °C  | Suited for bonding similar and dissimilar materials as plastics and metals.   |
| D5320     | 0.012                     | TR             | 0,180                   | PP<br>0.07 mm red                                | 17 N/20 mm<br>1 mm/3 h    | 185°C   | Is ideal for a continuous long-run mounting application of a variety of decorative strips in the furniture industry applications in sign and nameplate markets.   |
| D9600     | 0.012                     | TR             | 0,100                   | Si PE-coated paper 125 g/m²<br>white             | 17 N/20 mm<br>1 mm/3 h    | 130 °C  | Flame retardant polyester tape which is able to maintain the flame retardant properties of certain complexes.   |
| D9608     | 0.050                     | WH             | 0,110                   | Si PE-coated paper 125 g/m <sup>2</sup><br>white | 10 N/20 mm<br>0.5 mm/3 h  | 185 °C  | To mount a variety of plastics for graphic overlay. The opacity of the carrier allows a reduction of the back printing operations at screen printers and provides the necessary white colour for digital printing. The adhesive will not yellow during life time. |
| D5352     | 0.012                     | TR             | 0,130                   | Si PE-coated paper 125 g/m <sup>2</sup><br>white | 20 N/20mm<br>1 mm/3h      | 100 °C  | Excellent mounting tape used to bond graphic overlays, plastic plates, molds and foams. It has a high adhesion on different kinds of substrates.  |

Colour: AN= antracite; B K= black; GR = grey; TR = transparent; WH = white (1) Tape thickness = total tape thickness without release liner (2) Adhesion according to EN 1939 (300mm/min on BA steel at 180°)

#### Foam tapes

| Reference | Foam colour | Foam thickness(1)<br>mm  | Release liner   | Adhesion(2)/<br>Cohesion  | SAFT(3)        | Description  |
|-----------|-------------|--------------------------|---|---------------------------|----------------|--|
| 57XX LE   | AN          | 0,3<br>0,5<br>0,8<br>1.0 | Si PE-coated paper 125<br>g/m² white<br>(Green nitto print) | 16-17 N/20 mm<br>1 mm/3 h | 115 <i>°</i> C | Double-coated foam tape with low emission values. Ideal for mounting parts where shock and tolerance absorption is required. Good adhesion on low surface energy (LSE) surfaces. This product is UL listed (UL-746A / UL-746C). These products can be used for interior and exterior applications. |
| 5790      | AN          | 0.5<br>0.8<br>1.0        | Si paper 120 g/m² brown                                     | 17 N/20 mm<br>1 mm/3 h    | 115 <i>°</i> C | Ideal for mounting parts where shock and tolerance absorption is required. Good adhesion on low surface energy (LSE) surfaces.   |
| 5790PE    | AN          | 0.8<br>1.0               | Si PE-coated paper 125<br>g/m²<br>white                     | 17 N/20 mm<br>1 mm/3 h    | 115 °C         | Tape designed for bonding metal sheets, nameplates, emblems, glass parts and a wide range of plastics to several substrates.  These products can be used for interior and exterior applications.   |
| 5790YPP   | AN          | 0.8<br>1.0<br>1.5        | 2-sided Yellow PP (0.100 mm)                                | 17 N/20 mm<br>1 mm/3 h    | 115 <i>°</i> C | Tape designed for bonding metal sheets, nameplates, emblems, glass parts and a wide range of plastics to several substrates.  These products can be used for interior and exterior applications.   |
| 5791      | AN          | 1,0<br>1.5               | Si paper 120 g/m² brown                                     | 11 N/20 mm<br>1 mm/3 h    | 105 <i>°</i> C | Ideal for mounting of parts where tolerance absorption is required. Good adhesion on low surface energy (LSE) surfaces.  |

<sup>(1)</sup> Foam thickness = total tape thickness without release liner (2) Adhesion according to EN 1939 (300mm/min on BA steel at 180°) (3) SAFT: Shear Adhesion Failure Temperature

## Transfer tapes

| Reference          | Tape Thickness mm* | Release liner  | Adhesion(2)/<br>Cohesion | SAFT(3)        | Description  |
|--------------------|--------------------|--|--------------------------|----------------|--|
| 5015TLE            | 0.080              | Si PE-coated paper 125g/m²<br>white<br>(Green nitto print) | 15N/20 mm<br>1mm/3h      | 120°C          | Low emission tape suitable for interior applications such as car interiors, electronic devices and houses. Suitable for foams and plastics, especially on low surface ernergy surfaces.  |
| 597B               | 0,070              | Si paper 90 g/m² white                                     | 12.5 N/20 mm<br>1mm/3h   | 100°C          | General purpose mounting tape for graphic displays. Also available with a 90 g/m² siliconised havana release liner (597N).   |
| 5005TP             | 0.050              | Si PE-coated paper<br>125 g/m² white                       | 16.5 N/20 mm<br>1mm/3h   | 130°C          | Multi purpose transfer tape especially suitable for low surface energy substrates.   |
| 5015T              | 0.080              | Si paper 120 g/m² brown                                    | 19 N/20 mm<br>1 mm/3 h   | 130 °C         | Multi purpose transfer tape especially suitable for low surface energy substrates. Also available with white siliconised PE coated release liner (5015TP).   |
| 5015TPi (DL) / (+) | 0.080              | Si PE-coated paper<br>125G/M <sup>2</sup> white            | 19 N/20 mm<br>1 mm/3 h   | 130 °C         | Tape used to bond graphic overlays, plastic plates surely if they have low surface energy.  Available with double liner (5015TPI(DL))  |
| 5025T              | 0.130              | Si paper 120 g/m² brown                                    | 24 N/20 mm<br>2 mm/3 h   | 130°C          | This tape is used on a wide variety of surfaces, to bond graphic overlays, plastic plates and molds, surely if they have a low surface energy.   |
| D9500              | 0.050              | Si PE-coated paper 125g/m <sup>2</sup><br>white            | 15 N/20 mm<br>0.5 mm/3 h | 165 <i>°</i> C | Flame retardant transfer tape, which is able to maintain the flame retardant properties of certain complexes.  |
| D5952              | 0.080              | Si paper 90 g/m² havana                                    | 20N/20 mm<br>1mm/3h      | 100°C          | The tape has a very high initial adhesion , agressive tack and is ideal for foam lamination purposes . Also avialable with 120g/m² brown paper release liner (D5952N) and a 125g/m² PE coated paper liner (D5952P). P-version is UL listed (UL-746A/UL 746C) |

<sup>(1)</sup> Tape thickness = total tape thickness without release liner (2) Adhesion according to EN 1939 (300mm/min on BA steel at 180°) (3) SAFT: Shear Adhesion Failure Temperature

#### Non-woven tapes

| Reference | Tape thickness(1) | Release liner  | Adhesion(2) /<br>Cohesion | SAFT(3) | Description  |
|-----------|-------------------|--|---------------------------|---------|--|
| E1N140G   | 0,140             | Si PE-coated paper 125g/m <sup>2</sup><br>white<br>(Blue nitto print)  | 10nN/20mm<br>1mm/3h       | 170°C   | Emulsion tape with high repulsion resistance and adhesion on different foams. It reaches the VDA 278 on low emission values and has an excellent reistance to humidity .   |
| D5052     | 0,140             | Si paper 120g/m² white   | 20N/20mm<br>1mm/3h        | 100°C   | The tape has a high adhesion, good temperature resistance and agressive tack. It is especially designed to laminate a variety of foams and other materials, like cork and textiles. Easy to convert. Also available with havana paper liner of 90g/m² (D5052H) |
| 5015E     | 0,160             | Si paper 120g/m² white   | 16N/20mm<br>1mm/3h        | 135°C   | Multi purpose tape (UL listed: UL-746A / UL-746C) with superior repulsion resistance, especially suitable for low surface energy substrates  |
| 500       | 0,160             | Si paper 90g/m² white  | 12N/20mm<br>1mm/3h        | 130°C   | Multi purpose mounting tape with good workability. Also available with white PE coated paper release liner of 125 g/m² (500S).   |
| 5015ELE   | 0,160             | Si PE-coated paper 125g/m <sup>2</sup><br>white<br>(Green nitto print) | 14N/20mm<br>0,5 mm/3h     | 185°C   | This low emission tape is designed for bonding cushioning and sealing materials in office automation equipments and home appliances.   |
| 5000NS    | 0,160             | Si PE-coated paper 125g/m <sup>2</sup><br>White                        | 16N/20mm<br>0mm/3h        | 150°C   | This tape is designed for bonding cushioning and sealing materials in office automation equipments and home materials in office automation equipments and appliances. The tape is an ideal solution where recycling home by disassembly is required            |
| 5050S     | 0,105             | Si paper 90g/m² havana   | 8N/20mm<br>1mm/3h         | 150°C   | Multi purpose tape . The combination of high adhesion and high shear allows the product to be used as mounting and splicing tape.  |

<sup>(1)</sup> Tape thickness = total tape thickness without release liner (2) Adhesion according to EN 1939 (300mm/min on BA steel at 180°) (3) SAFT: Shear Adhesion Failure Temperature
